

TRAIID & TELEHEALTH MAKING AN IPAD MORE ACCESSIBLE FOR NEW USERS

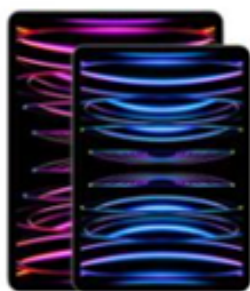

Justice Center for the
Protection of People
with Special Needs

CREATING A MORE SEAMLESS EXPERIENCE

When working with new iPad users consider the following:

- Does the user have low vision?
- Is the user hard of hearing?
- Does the user have limited dexterity?

Understanding the users' needs can help identify the devices and features that might work best for them.

New

iPad Pro

iPad Air

New

iPad

10th generation

iPad

9th generation

iPad mini

ACCESSORIES

KEYBOARDS

Can be helpful for people who have difficulty with touchscreens

Can help users who have trouble with finger dexterity

ACCESSIBILITY OPTIONS

DISPLAY TEXT & SIZE

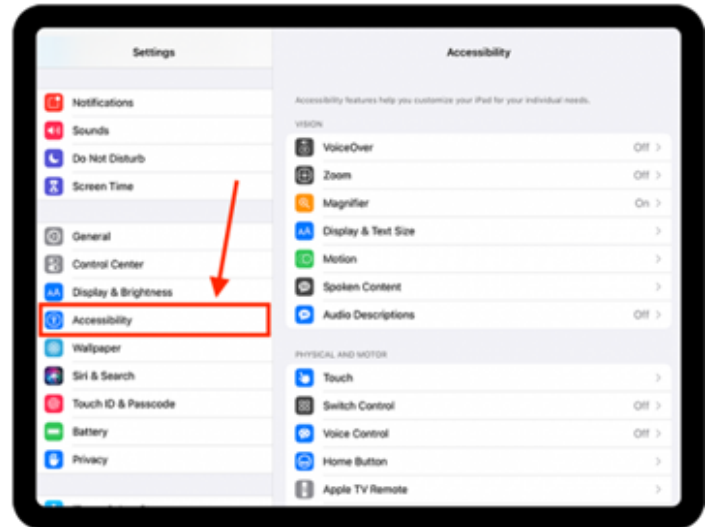

Options to make text bold, increase contrast, make text larger, and more

SUBTITLES & CAPTIONING

Options to turn on closed captions for videos

HEARING DEVICES

Option to connect with hearing aids with Bluetooth capability

CHOOSING AN IPAD - PHYSICAL CHARACTERISTICS

- Larger screens can be better for individuals who need more magnifications but are less portable.
- Smaller screens are more portable but may be harder to see.
- Some devices will have a home button, others require gestures to go back to the home screen.
